

Accountability Structure

Last Updated: December 2022

HPA-OHT’s vision is a sustainable, people-driven system that strives to provide a positive experience for all. There is commitment to embrace change and prioritize health outcomes, create relationships based on trust and share organization resources for collective improvement, eliminate gaps and duplication to provide optimal care and deliver evidence-based, fiscally responsible and sustain care for all citizens.

The Accountability Structure depicts HPA-OHT groups comprised of Formal Members, Collaborating Partners, Physicians & Specialists, Patient/Family/Caregiver partners and invited experts. The Structure outlines transparency and the tenets of responsible governance that are demonstrated through the quality and reliability of information — financial and non-financial — provided to stakeholders, employees, and the public.

Advisory councils are a structured way for individual citizens to share their opinions and perspectives, study issues, and develop recommendations in a focused, small group structure.

A working group is a group of experts working together to achieve specified goals. The groups are domain-specific and focus on discussion or activity around a specific subject area.

Implementation Committee Make-Up

Long-term care (1), family health teams/community health centres (1), home care (1), hospitals (2), community support services (1), physicians (3), patients, families, and caregivers (2), mental health and addiction (1)
