Land Acknowledgement

We acknowledge and give thanks for the land on which we gather as being the traditional territory of the Haudenosaunee/People of the Long House and the Anishinaabe.

We recognize the First Peoples' continued stewardship of the land and water, and that this territory is subject to the Dish with One Spoon Wampum under which multiple nations agreed to care for the land and resources by the Great Lakes in peace.

We also acknowledge and recognize the treaties signed in regard to this land including Treaty #29 and Treaty #45 ½. Our roles and shared responsibilities as treaty people mean we are committed to moving forward in reconciliation with gratitude and respect with all First Nations, Métis, Inuit and Indigenous Peoples.

Project Updates – Integrated Decision Support (IDS)

What can IDS do for the Huron Perth and Area Ontario Health Team and its partner organizations?

- IDS provides a comprehensive ready-to-use platform with an integrated view of patient activity. Organizations are not limited to their current data sharing partners, but any IDS participant that your patients encounter.

- IDS enables centralized data analysis and reporting that is accurate, timely and in context. Tools within IDS allow for comprehensive evaluation of data from across the HPA-OHT to allow for learning, monitoring, engagement, and change based on data driven decisions.

- IDS removes the need to develop systems and databases that collect, store, assemble, calculate, and report on data. IDS also facilitates multiple partner agreements as it provides a robust, pre-built platform with data governance.

QUESTION

BACKGROUND: Setting goals in Huron Perth and Area to achieve Health Equity

COMING FROM MEMBERS: If you are a SAA's holder you are required to complete an EIDA-R plan by June 30th.

QUESTION(S):

- Who has a SAA?
- What are the needs in organizations that the OHT can take on for the collective?

THOUGHTS?
